

THE FASTMARK PRINTER SERIES FEATURING PAL

THE THERMAL PRINTER SOLUTION
FOR HEALTHCARE FACILITIES

AMTDatasouth

Introducing Fastmark Printers featuring PAL from AMT Datasouth

Now you don't have to get a different software-specific printer for every application in your facility. Fastmark printers with PAL can translate, filter, interpret and understand almost any data stream. You can now replace obsolete devices with cost-effective, high-print-quality Fastmark thermal printers – with no expensive software changes.

HERE IS A BRIEF OVERVIEW:

- Quick, high-resolution printing of wristbands, labels, tags and more
- Features PAL (no software reprogramming required!)
- Works for all departments, regardless of what software they're using
- Can be run even when the system is down (label format is stored in the printer)
- Offers plug and play convenience
- Fastmark is remarkably affordable, quiet and compact

WHAT'S MORE ...

- Barcodes can be added to existing print jobs without changing software
- A security feature prevents unauthorized changing of settings
- Fastmark supports common thermal printer languages and, with PALSM, almost any legacy printing device, including dot matrix or card embosser

HOW DOES PAL ENABLE YOU TO PRINT YOUR CURRENT DATA STREAM—WITHOUT REPROGRAMMING YOUR SYSTEM?

PAL is not only a powerful printing language, it is also a fully functional programming language. We prepare a PAL program for each of your applications and pre-load it into your Fastmark printer at the factory. These PAL programs enable Fastmark to print labels by filling in the variable fields using your current data stream. This data stream could have been intended for a laser, dot matrix, ink jet or embossing printer. And, you don't have to worry about the software driver in the host, because the formatting is all done within the Fastmark printer.

Fastmark is packed with features:

- Competitive language emulations
- Parallel and serial ports
- Optional Ethernet, Twinax, Coaxial and USB communication
- Extensive on-board complement of linear and 2-D symbology barcodes
- Expandable memory options
- Optional external keyboard for stand-alone applications
- SRAM and Flash memory management cards
- Optional real-time clock
- Rugged cabinet construction

All Fastmark products include the latest in Windows™ drivers.

To learn more about Fastmark printers and how they can be quickly and cost-effectively integrated into your facility, call AMT Datasouth at 800-215-9192 or visit www.amtdatasouth.com.
